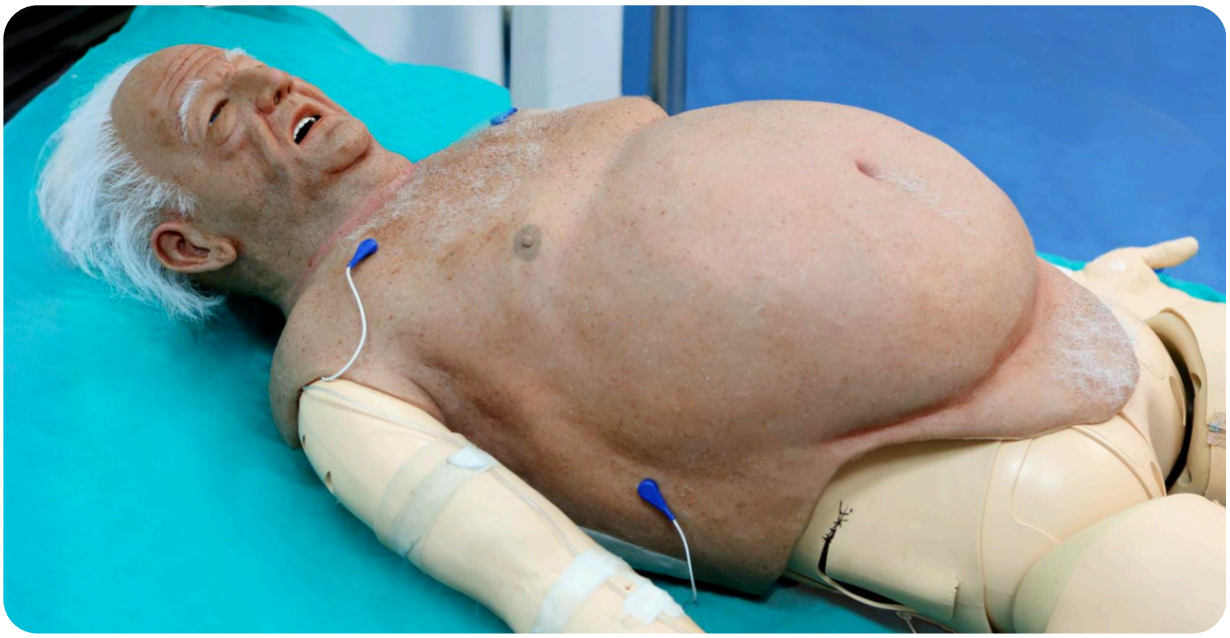
EMULANT

The problem

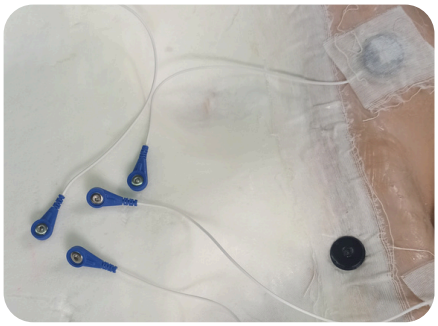
Training on a manikin that does not looks like your typical patients will not prepare students for real life. Performing **medical procedures** could be **more difficult on a robust patient.**

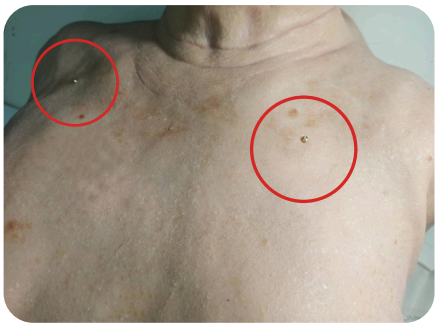


Our Solution

Realistic silicone overlays for medical teams in hospitals to train. With our overlays, a **greater emotional involvement** is achieved, thus improving the experience of medical simulation.

EMULANT





Key Features

- Corpulent body challenge
- Works on most simulators.
- Quick and easy setup and removal.
- Medical grade silicone.
- Easy to store and maintain.
- Made with technology that prevents tears.
- Hand painted by our artists.
- Hand applied hair.
- Includes ECG connectors
- Allows auscultation
- Fits over your simulator with a strap to secure it in place so the simulator can be seated/ moved.
- For use with a simulated Defibrillator.
- Included a sustainable box for temporary storage with support for the overlay.
